Profile

A dedicated BTech student specializing in Computer Science and Engineering with a focus on Artificial Intelligence and Data Science. Proficient in various programming languages and technologies, with a strong portfolio of projects showcasing expertise in web development and software engineering.

Education

2023/07 – 2027 BHOPAL, India	**LNCT Group of Colleges** ⧉ *CSE-AIDS* • BTech in Computer Science and Engineering (CSE) with a specialization in Artificial Intelligence and Data Science, LNCT, Bhopal.

Skills

Programming Languages:

C, C++, Java, JavaScript, Python

Databases:

MongoDB, Mongoose

Web Development:

React, Express, HTML, CSS

Tools:

Nodemon, Postman

Interests

Web Development │ Artificial Intelligence │ Data Science │ PCB Design and Coding │ Playing Chess │
Reading Tech Blogs │ Participating in Hackathons and Coding Competitions

Projects

FoodZone App

Developed a full-featured FoodZone app using React for both the frontend and backend. This project showcases my ability to design, develop, and deploy a responsive and user-friendly web application. The app includes features such as user authentication, menu browsing, order placement, and payment integration. Leveraged MongoDB for database management and implemented Express for server-side operations. This project demonstrates my skills in full-stack development, database integration, and creating seamless user experiences.
